

BUCHANAN "pres-SURE" CONNECTORS for ELECTRICAL WIRING

Underwriters Approved

The Buchanan Splice Caps for "pigtail" splicing of electrical wires are now available in an improved open-end construction which considerably facilitates their installation and inspection.

These new open-end Splice Caps insure that wire insulation is always flush with the Splice Cap for maximum circuit protection and that wires are always inserted to the full depth of the Splice Cap for maximum joint efficiency.

Only two sizes of Splice Caps are required for all most frequently used combinations of two or more wires ranging all the way from two #18 to three #8. Quickly applied snap-on insulators of fixed insulation value eliminate necessity for taping of joints and insure against insulation breakdown in service.

BUCHANAN "pres-SURE" CONNECTORS for ELECTRICAL WIRING "pres-SURE-tools"

The C24 hand operated "pres-SURE-tool" which installs both 2004S and 2011S Splice Caps also installs manufacturer's Termend lugs on all wire sizes from No. 16 to No. 8. This tool features an exclusive four-way "pres-SURE-crimping" action which insures permanent connections of maximum electrical and mechanical efficiency and is equally effective on solid or stranded or on combinations of solid and stranded wires. Weighing just one pound, this tool is only 8 inches in overall length and is provided with easy-grip handles protected with vinyl tubing.

Illustrations, left to right, show how the uniform converging action of the 4 plungers in the Buchanan Tool draws connector and conductors together to form a solid permanent unit.

Cat. No.	For Installing—		Unit Pkg.	Wt. Lbs. Each	Price Each
	Splice Cap	Termend Lugs			
C22A	2001S	-----	1	1	\$5.90
C24	{2004S} {2011S}	16-8 Series	1	1	5.90
